* not to scale

~ # cat About.txt

I am an experienced pragmatic autodidact engineer. I have a large background in dealing with distributed systems built on linux. Originally I was a PHP developer, but I spent the last 5yrs working with Go at a massive scale/speed. I absolutely love being challenged by complex problems and trying to find effective, quick, and long living solutions. In addition to being knowledgeable in my tools of the trade I also bring outside skills/passions that make me and my team more effective. For example, offensive security, public speaking, hardware design, and social equity & justice.

~ \$ history

GoodRx Sr. Software Engineer

August 2017 - Present ■ Santa Monica, CA

- + Platform engineer on service with millions of daily requests
- + Wrote data ingestion for partners/vendors
- + Wrote live transaction data workflow (millions of daily request)
